

NEAR EAST SERVICES

Quality & Sustainability

COMPANY PROFILE

WHO ARE WE?

NES was established in 1967 as the first Egyptian owned Company in the fields of Inspection, Verification, Testing, Training & Certification. Since then, NES has a proven good track of the best service delivery and technical capabilities maintaining a record of success stories either while acting independently or as a partner with major international parties in the conformity assessment & training fields.

NES VISION

To be a leading regional and international provider of impartial, reliable, and high-quality conformity assessment services, fostering trust among clients, regulators, and stakeholders while contributing to the enhancement of product and service quality across all sectors.

NES MISSION

NES committed to delivering independent and technically competent inspection, certification, testing, verification, and validation services in compliance with international standards with innovative and bespoke Assurance.

THE HISTORY BEHIND NES

**Eng. Osman Mohamed
Ahmed Osman**
NES Founder

Born in 1954 as a member of the prominent Osman family. Founders of modern infrastructure engineering in Egypt the middle east and Africa.

Graduating as an Architect from Cairo University in 1978 in the midst of the pivotal political and economic reform under late President Sadat.

Transforming Egypt from a public sector controlled economy to a more free economy with a greater role to the private sector.

Commenced career path by joining family group as site engineer covering prestigious projects (cement silos & flyovers).

Swiftly excelling in his career to later be named as the Managing Director of the famous German contracting company D&W Egypt.

1981 took over the management & partnership with SGS inspection co. Member of the Egyptian accreditation council from 2002- 2007

2012 founder of NES the leading Egyptian company verification, testing, training, inspection and certification.

Today NES stands tall in the Egyptian market with 45,000+ customers and rapidly expanding within the MENA region.

A people believer at heart. Eng. Osman believes that success is only achieved by a team whom are empowered by their management.

Only than will they be able to go where there is no path and leave behind a trail for others to follow. Leadership is all about facilitating the endeavors of one's team.

Driven by his personal character, philosophies and tremendous leadership skill, Eng. Osman became one of the influential individuals with re-known leadership skills in the global certification industry.

Mrs. Amina Osman
NES - CEO

WHAT WE DO

Management system certification

We provide management system assessment and certification to a range of internationally recognised standards including: ISO 9001, ISO 14001, ISO 22000, ISO 27001, ISO 45001, FSSC 22000.

Product certification

We provide product certification including: Global Organic Textile Standard (GOTS) and Textile Exchange (OCS, RCS, GRS, RDS, RWS, RMS and RAS).

Inspection

We provide verification of lift installations to the UK Lifts Regulation 2016, Schedules 15, 18 and 19.

Verification

We provide verification services to a range of EU recognised standards including: Higg FEM, ISCC, CFP, ESG and Labor Convergence Program (SLCP).

Training

We provide a range of management systems, product systems and verification training on a worldwide basis.

RECOGNITION & AUTHORIZATION

ACCREDITATIONS

Near East Services is a reputable company dedicated to providing high-quality services in the field of quality Assurance Services. The company's commitment to excellence is reflected in its various accreditations, which underscore its adherence to industry standards and best practices. Near East Services proudly holds the following key accreditations:

Accredited by EGAC (National AB and IAF member)
to ISO 17020, 17021, 17025, 17065 and 17029 standards.

BUSINESS PARTNER

NES is the business partner of the most known Conformity Assessment and Training Bodies worldwide:

BRC GLOBAL STANDERD

BRCGS Issue 9 (Food Safety)

- A globally recognized GFSI food safety manufacturing program regarded as a benchmark for compliance to good practice in food industry standards.

BRCGS Issue 7 (Packaging Materials)

- A globally recognized GFSI standard for Packaging Materials helps packaging organizations deliver products that help support the delivery of safe, hygienic food.

BRCGS Issue 4 (Storage and Distribution)

- A global standard covering all activities that can affect the safety, quality, and legality of food, packaging and consumer products in storage and the process of distribution.

BRCGS Issue 2 (Agents and Brokers)

- A global standard for non-manufacturing traders helping them to demonstrate the legitimacy and capability of their business to deliver safe quality food products to their customers.

VERIFICATION SERVICES

Why GHG Verifications are essential and how NES Quality & Sustainability can help?

As climate change continues to dominate the global agenda, organizations are under increasing pressure to prove the integrity and reliability of their greenhouse gas (GHG) emissions data. To meet this demand, companies are turning to reliable standards for GHG inventory verification.

VERIFICATION SERVICES

ISO 14064-1

ISO 14064-1 is an international standard developed by the International Organization for Standardization (ISO) that provides guidance and requirements for quantifying and reporting greenhouse gas (GHG) emissions and removals at the organizational level.

ISO 14067

ISO 14067 is an international standard that provides principles, requirements, and guidelines for quantifying and reporting the carbon footprint of a product (CFP).

Who Uses ISO 14067?

Manufacturers aiming for eco-labeling or carbon declarations. Organizations involved in product sustainability assessments. Brands wanting to make "low-carbon" or "carbon-neutral" product claims.

Entities responding to CDP, ISCC PLUS, or retailers' climate targets.

VERIFICATION SERVICES

Certification according to ISCC EU / ISCC PLUS

It means certification of biofuel or bioenergy based on specific sustainability requirements. Certification conforms to the requirements of Renewable Energy Directive (RED II), EU 2018/2001.

ISCC EU has been fully recognized by the European Commission since 2011
With ISCC EU certification the compliance with the legal requirements for the sustainability and greenhouse gas (GHG) emissions savings criteria for sustainable fuels and the production of electricity, heating and cooling from biomass set out in the renewed Renewable Energy Directive

ISCC

& Carbon Certification

VERIFICATION SERVICES

HIGG FACILITY ENVIRONMENTAL MODULE (HIGG FEM)

The Higg Index is an apparel and footwear industry self-assessment standard for assessing environmental and social sustainability throughout the supply chain.

It was developed by the Sustainable Apparel Coalition, a non-profit organization founded by a group of fashion companies. The Higg facility environmental module (Higg FEM) is a sustainability assessment tool that standardizes how facilities measure and evaluate their environmental performance.

SOCIAL & LABOR CONVERGENCE PROGRAM

SLCP – aims to bring together unique perspectives to create an efficient, scalable and sustainable solution for social audits.

This program will help the industry to:

- Eliminate audit fatigue: avoid duplication and reduce the number of social & labor audits.
- Increase the opportunity for greater comparability of social & labor data.

PRODUCT CERTIFICATION

OCS (ORGANIC CONTENT STANDARD)

The OCS applies to any non-food product containing 5-100 % organic material. It addresses the flow of product within and between companies, raw material verification, post-harvest processing, manufacturing, packaging and labelling, storage, handling, and shipping through the seller in the last business-to-business transaction.

RCS (RECYCLED CLAIM STANDARD)

The Recycled Claim Standard (RCS) is an international, voluntary standard that sets requirements for third-party certification of Recycled input and chain of custody. The Recycled Claim Standard is intended for use with any product that contains at least 5% Recycled Material. Each stage of production is required to be certified from beginning to end in final business to business transaction.

GOTS (GLOBAL ORGANIC TEXTILE STANDARD)

The Global Organic Textile Standard (GOTS) is the worldwide leading textile processing standard for organic fibres through covering social, chemical and environmental requirements in every stage of processing units. The aim of this standard is to ensure atleast 70% of organic fibre, social, and environmental criteria to provide an assurance to the end of customer.

GRS (GLOBAL RECYCLED STANDARD)

The GRS is an international, voluntary, full product standard that sets out requirements for third-party certification of recycled content, chain of custody, social and environmental practices and chemical restrictions. The goal of the GRS is to increase use of recycled materials in products and reduce/eliminate the harm caused by its production.

NES INSPECTION SERVICES

NES is a leading provider of high-quality inspection services, dedicated to ensuring the safety, quality, and compliance of products and processes across various industries.

With a team of qualified experts, NES offers precise and reliable inspection solutions that serve sectors such as manufacturing, agriculture, construction, and international trade.

At NES, we are committed to verifying standards, minimizing risks, and strengthening customer trust through detailed reports and thorough evaluations at every stage of the supply chain.

NES can cover all Egyptian ports and locations and can perform any inspection needed related to mineral, agricultural, industrial.
